DACIA LODGY STEPWAY AND DOKKER STEPWAY AT PARIS MOTOR SHOW

- **Dacia is boosting its offering with new Stepway versions.**
- **Lodgy Stepway and Dokker Stepway boast a muscular look and powerful personality inspired by crossover vehicles.**

Dacia is extending the Stepway offering already available on Sandero to include Lodgy and Dokker.

Lodgy Stepway[1] and Dokker Stepway, go-anywhere versions of the minivan and leisure activity vehicle

The new Stepway versions of Lodgy and Dokker boast a muscular look and powerful personality inspired by crossover vehicles.

The two new versions feature special design components:

- body-colour front bumpers (and rear bumpers on Lodgy),
- satin-chrome appearance front and rear skidplates,
- front fog lamps with satin chrome appearance surrounds,
- black wheel arch protection,
- dark metal-colour finish on the roof bars, rearview mirrors shells and 16" alloy wheels dark metal.

Lodgy Stepway and Dokker Stepway are available in five body paint including the Azurite blue body paint (exclusive for Stepway versions) with a "Stepway" decal on the front doors. Following in the footsteps of Sandero Stepway, both models boast assertive and adventuresome styling.

Special interior and comprehensive equipment

Lodgy Stepway and Dokker Stepway feature special upholstery with embroidery and blue topstitching.

The dials and air vents are circled in the same blue tone to be found on the central instrument cluster. The colour contrasts perfectly with the Dark Carbon interior design scheme, further underscoring the vitality of the new Stepway models.

Expanding the existing range, Lodgy Stepway and Dokker Stepway versions ship with a wide range of equipment (standard or optional), including: the touchscreen Media Nav multimedia and navigation system, air conditioning, a speed limiter/cruise control system and a reversing radar. And for even more everyday practicality, both trim levels come with new net storage pockets in the rear.

Lodgy Stepway and Dokker Stepway powered by frugal, high-performance engines[2]

Lodgy Stepway is available with the petrol engine TCe 115 mated to a 5-speed manual gearbox.

The TCe 115 unit consumes just 5.7 l/100 km^[3] over a combined cycle for the five-seater model, for CO₂ emissions of 131 g/km³ (5.9 l/100 km³ and 135 g/km³ for the seven-seater).

For diesel fans, Lodgy Stepway is available with the dCi 110 engine

The dCi 110 is among the most frugal engines in the segment, at 4.4 l/100 km³ (116 g/km³ of CO₂) respectively.

Dokker Stepway is available with one petrol engine and one diesel engine[2]

Dokker Stepway ships with the **TCe 115 petrol** unit, with fuel consumption of just 5.8 l/100 km³ over a combined cycle and CO₂ emissions of 135 g/km³.

Dokker Stepway is available with dCi 90 diesel powerplant

With 90 hp, the engine is remarkably frugal, consuming a modest 4.5 l/100 km³ over a combined cycle for CO₂ emissions of 118 g/km³.

[1] Lodgy Stepway is available in five-seater and seven-seater versions.

[2] Engine availability for France.

[3] Fuel consumption and emissions figures homologated according to prevailing regulation.
